

IARU REGION 1 VHF AND MICROWAVE BEACON LIST - January 2004

This list of VHF/UHF Beacons is compiled for IARU Region 1 by G0RDI of the RSGB VHF Committee, and it builds upon the valuable work contributed by G3UUT. Many thanks to the VHF/UHF/ Microwave managers of radio societies across Region 1, beacon keepers, beacon coordinators and VHF/UHF DXers too numerous to mention.

Note that this edition includes the planned new frequencies for the 432 MHz beacons – the changes are scheduled to happen by the end of 2003. During the second half of 2003 the plans will also be made to move the 24 GHz beacons in accordance with an agreement made at the San Marino conference.

The main region 2 & 3 6m beacons are included in the list in italics for completeness. Thanks to G3USF, the IARU HF beacon coordinator for these. All inputs are welcome and should be sent to the address below.

You are free to use information from this beacon list but please acknowledge IARU Region 1 and G0RDI.

Iain Philipps G0RDI IARU Region 1 VHF Beacon Coordinator Email: g0rdi@77hz.com  
 Phone: +44 1494 432144  
 Mail: 24 Acres End  
 Amersham  
 Buckinghamshire HP7 9DZ England

The list is also posted on the RSGB Data Communications Committee web site at [http://www.dcc.rsgb.org/beacons/R1\\_VHF\\_Beacon\\_List.pdf](http://www.dcc.rsgb.org/beacons/R1_VHF_Beacon_List.pdf)

Key

**Heading Column**  
 45°/315° Transmits at 45° and 315° continuously  
 0°/225° 1.5 Transmits at 0° and 225° alternatively at 1.5 minute intervals

**Power Column**  
 Unless otherwise stated, power is given as the Estimate Radiated Power in Watts relative to a dipole. The letters TX after a power level indicate the power level at the transmitter output.

**Status Column**  
 No Information On Air. The reliability of this information can be judged by the source and date in the last update column.
